Clean Growth 101 – Hybrid Workshop

Introduction

Clean Growth 101 is aimed at bringing a wide range of individuals across organisations up to speed with the language, challenge and opportunity from the transition to Net Zero. The session will introduce key concepts and language, support available across the region, and include tips on managing climate anxiety.

Who is it for?

This workshop is open to eligible SMEs on the Workforce for the Future programme. To be eligible for support, you must have a business presence in the West of England (Bath & North East Somerset, Bristol, South Gloucestershire and North Somerset) and be a small or medium sized enterprise (SME). **We encourage you to invite staff of all levels to attend.**

What will I get out of it?

- Increased understanding of key language and concepts in relation to sustainability and net zero
- Increased awareness around the commercial opportunities from the transition to net zero
- Increased awareness of West of England ecosystem and support for businesses around sustainability
- Increased understanding around challenges of climate anxiety and ways to manage this.

Agenda

10:00 - 10:15: The Clean Growth Challenge and Call to Action (Bristol Green Capital Partnership, Future Leap and Skills for Clean Growth)
